ELECTRONIC UNIT

***THE MOST PORTABLE ELECTRONIC
SYSTEM ON THE MARKET***

The electronic unit processes the signals from the target and sends the data into your device. In return, it assigns commands according to the chosen training mode by the in-built LED lights.

The device is coated in a bulletproof Hardox 500 shield casing, therefore it's extremely durable. The signaling lights are easily replaceable.

The Trainshot system brings you the pure joy of target shooting by eliminating the burden of manual procedures. Have all your shooting results, hit zones, reaction time and statistics right on your mobile or tablet!

The Trainshot system is a combination of patent pending targets and a small electronic unit, offering a digitalized scoring gauge and a range of training modes through our application on any smart device available.

ELECTRONIC TRAINING SYSTEM

PAPER TARGETS

***PATENT PENDING
MULTILAYER DESIGN***

The cardboard target has a unique patent which enables the pattern to detect hits on the surface. It is connected to the Trainshot system's electronic unit and sends the signals of your hit zones while simply attached to the metal casing.

The target can endure up to 100 shots before replaced. New boards cost no more than a single cup of coffee and can be personalized on request.

The customizable paper-based target communicates your data with the system and provides not only the real-time evaluation of your scores, but also a complete training mode with add-ons, guided by light signals and verbal commands.

With an affordable price, the Trainshot system is by no doubt the cutting edge smart solution you've been missing until now.

DIMENSIONS
590 x 440 mm

**TARGET
DURABILITY**
70 - 200 shots

MOBILE APPLICATION

The user-friendly application compatible with iOS and Android operating systems provides the key connection between the system and the user. You can choose from various training modes and game-like scenarios that can be further adjusted according to personal preferences. Up to four units can be added to the application.

CHOOSE A DESIGN

We are all different. That's why we created various targets suitable for differing preferences. By default, we offer four patterns and further personalization on demand.

5 Zone
Detection

MULTIPLE ZONE MODE

The application offers various modes for trainings and game-like challenges. The first of them is the Multiple zone mode which randomly assigns the strike zone to the shooter. The zones are indicated with a green LED light accompanied with verbal commands and they have to be hit during a recorded timeframe while the scores are automatically evaluated in real time.

 **CHARLIE!**

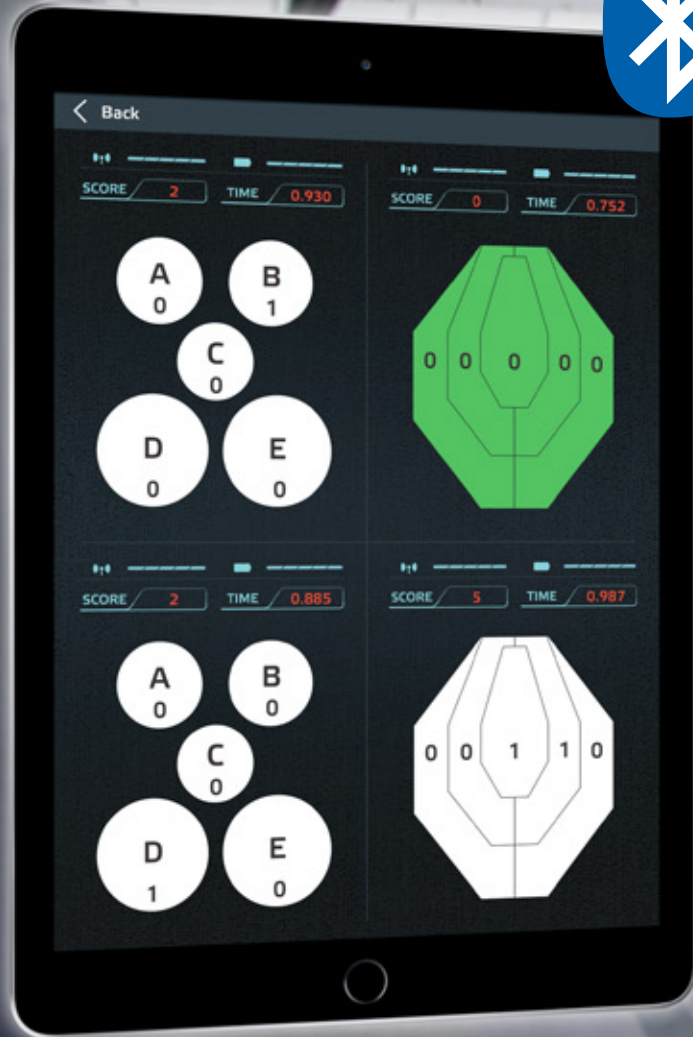

STAY ALERT!

Aim and shoot when the app assigns the hit zone.

REACTION TIME
0.952 sec.

MULTIPLE TARGET MODE

*SHOT THE **GREEN***

The Multiple target mode is a game changer for any shooter, experienced or not. Connect various targets to your device and train with different patterns to maximize your adrenaline level and test your skills. The application randomly assigns the target while it automatically evaluates your strike and time. The mode can be set up for multiple users.

MULTIPLE TARGET MODE

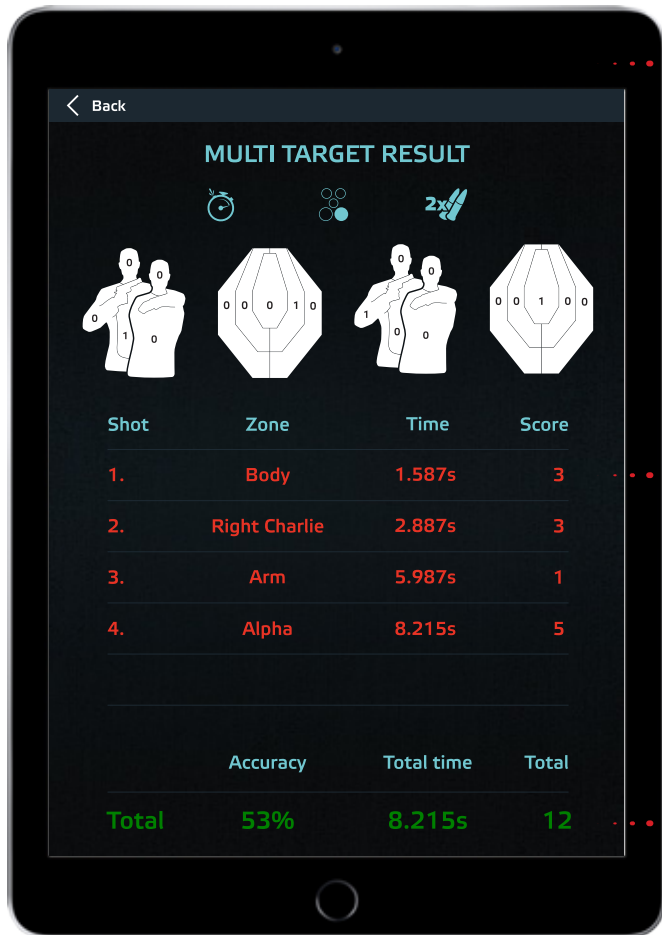

TIMER FUNCTION

REACTION TIME FOR EACH TARGET

The Tranishot system has an in-built timer that enables you to track your time. Challenge yourself to achieve more for less, each time you go for a round!

MULTIPLE TARGET MODE PARKOUR

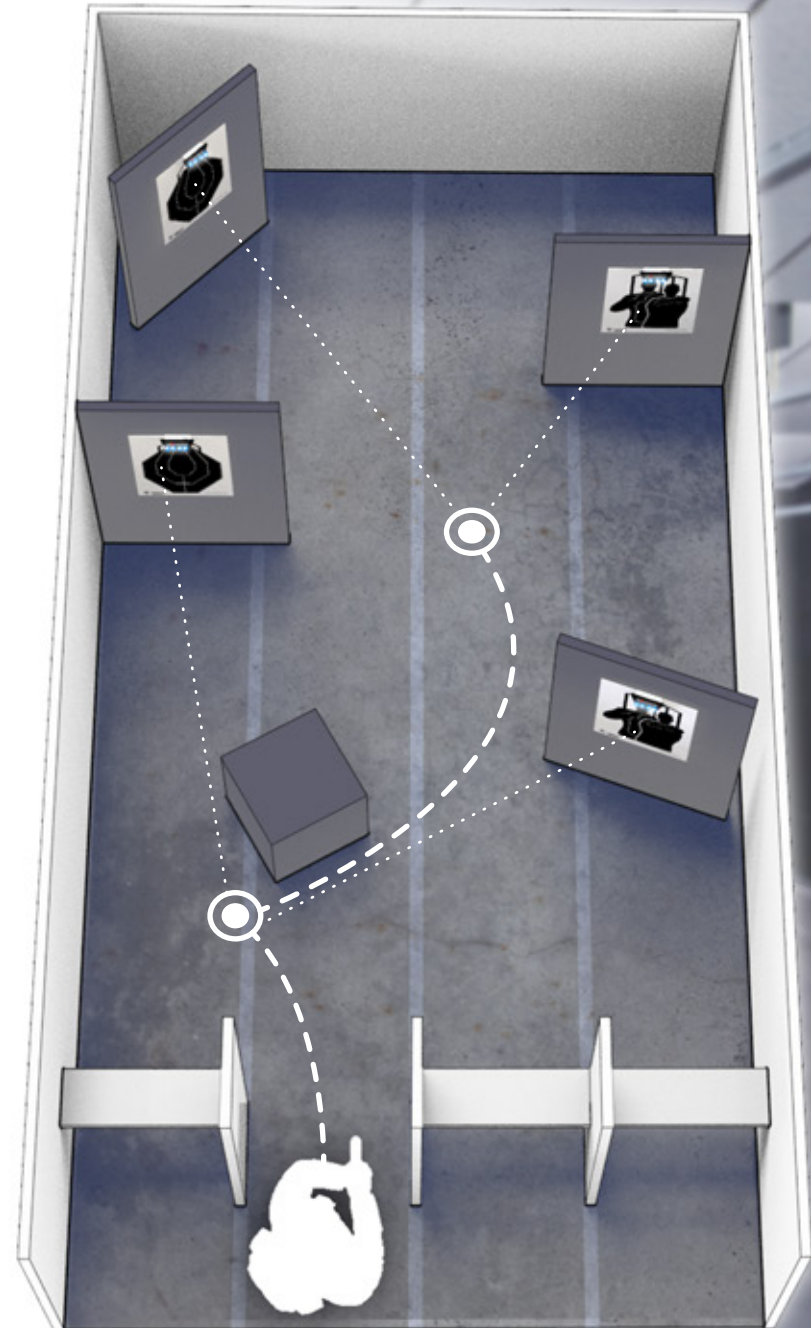

••••• SAVE & EXPORT YOUR RESULTS

Keep track of your progress effortlessly. The application automatically saves and archives all your score data.

••••• STATISTICS

App shows individual time and score of each hit

••••• OVERALL

COMBAT TRAINING

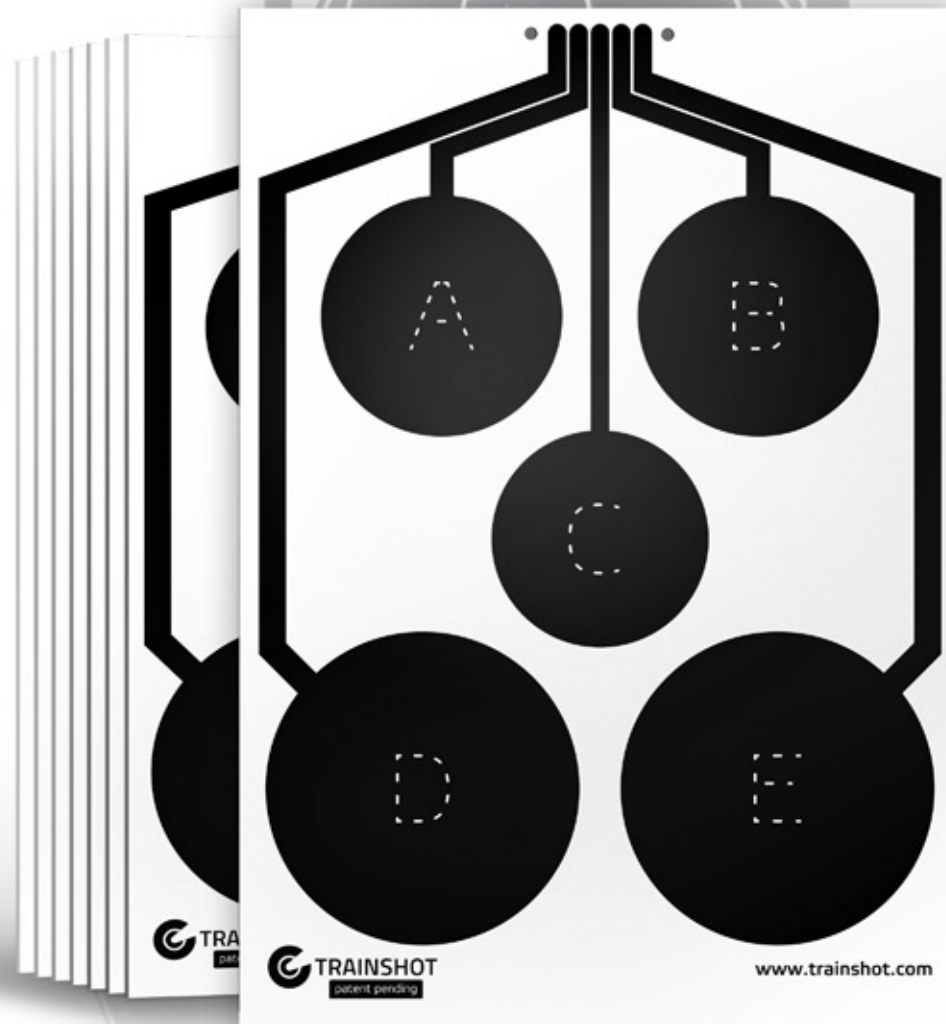

Create an adrenaline-filled battlefield with our combat mode! Set up your targets on different locations and connect them with the application to get different hit zones assigned. Transfer it into an exciting competition via multishooter mode.

SPORT SERIES

With our circles target you can efficiently train your shooting while focusing only on your skills and not the inconvenient manual set-up.

It doesn't matter whether you are an experienced shooter or an absolute beginner. This pattern covers various areas on the target which contributes to better aiming abilities.

CIRCLES

DOUBLE TAP DETECTION

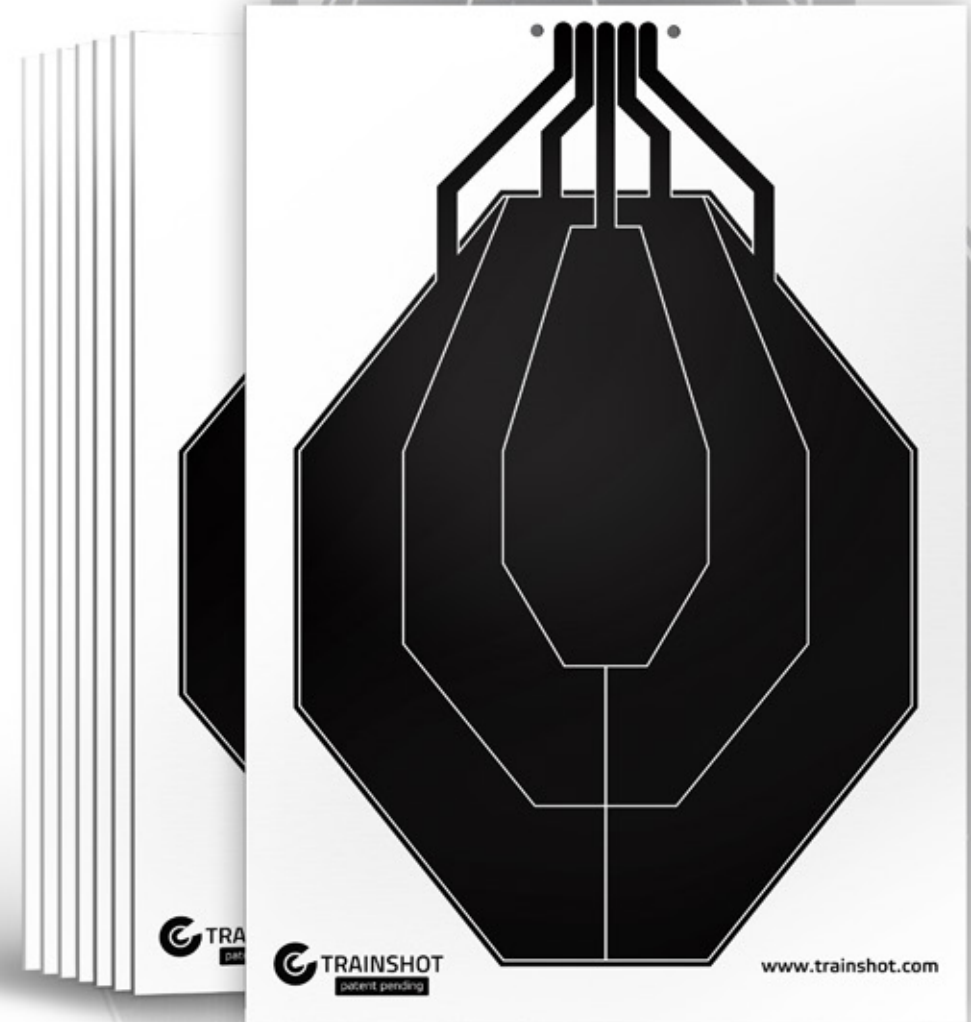

Record the time frame between two shots with our in-built timer mode!

CUSTOM TARGETS

Thanks to our patent technology we are able to prepare targets with patterns on demand. Simply just submit your sketch and description, to train with your personalized board!

IPSC

FORCE SERIES

The Force series was developed to train the tough guys - police, army and task forces. The target displays a hostage situation where the primary aim is to hit the captor. Go for the true experience with our special series.

HOSTAGE

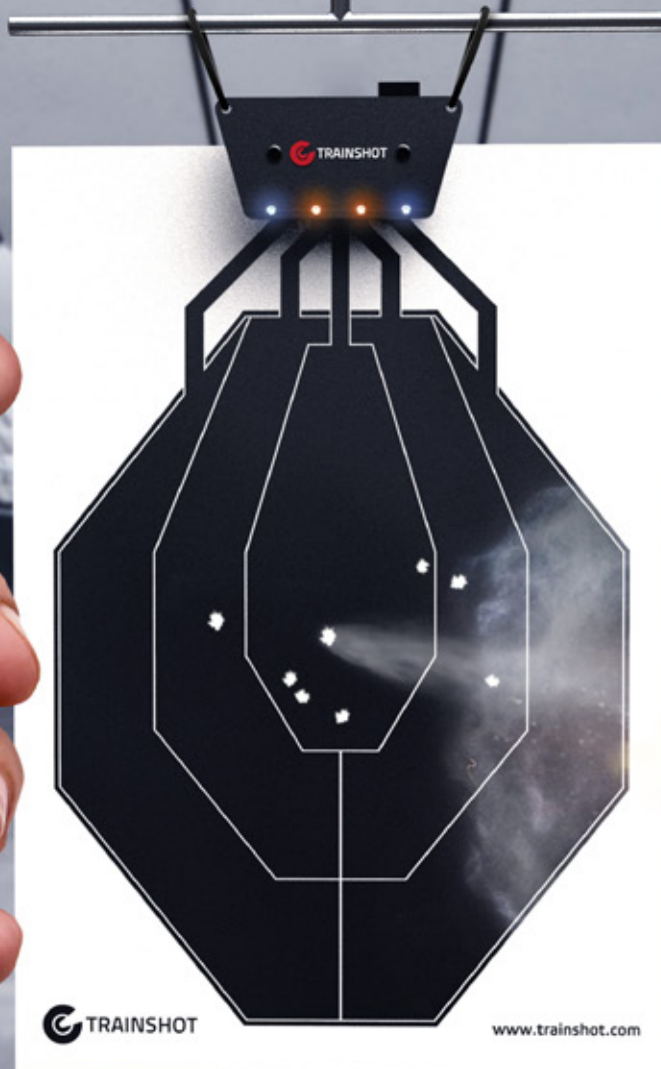

HUNT SERIES

Enjoy the thrills of hunting with the convenience of technological improvements. Train your shooting skills using a target with a silhouette of an animal and test your aiming with a prey that requires no quiet waiting in the bushes. Using this target, you can maximize your abilities before you go into the wild for the real challenge.

DEER

STARTER KIT

SIMPLE AND AFFORDABLE

Enter the world of shooting sports with our convenient Trainshot system and start your training effectively.

KIT INCLUDES

BLUETOOTH
1x ELECTRONIC UNIT

10x TARGET

1x FREE APP

EXTENDER

BRIDGE UNIT

SIMPLICITY

The starter kit is the basic kit of our Trainshot system available for a remarkably affordable price. Suitable not only for experienced shooters but beginners as well.

It is designed for personal usage, recommended for handguns and shorter distances.

The connection technology is based on Bluetooth but can be upgraded with add-ons from our e-shop.

3. SMART DEVICE

- Hit zone
- Score
- Reaction time
- Statistics

WEAPON

With metal ammunition

2. ELECTRONIC UNIT

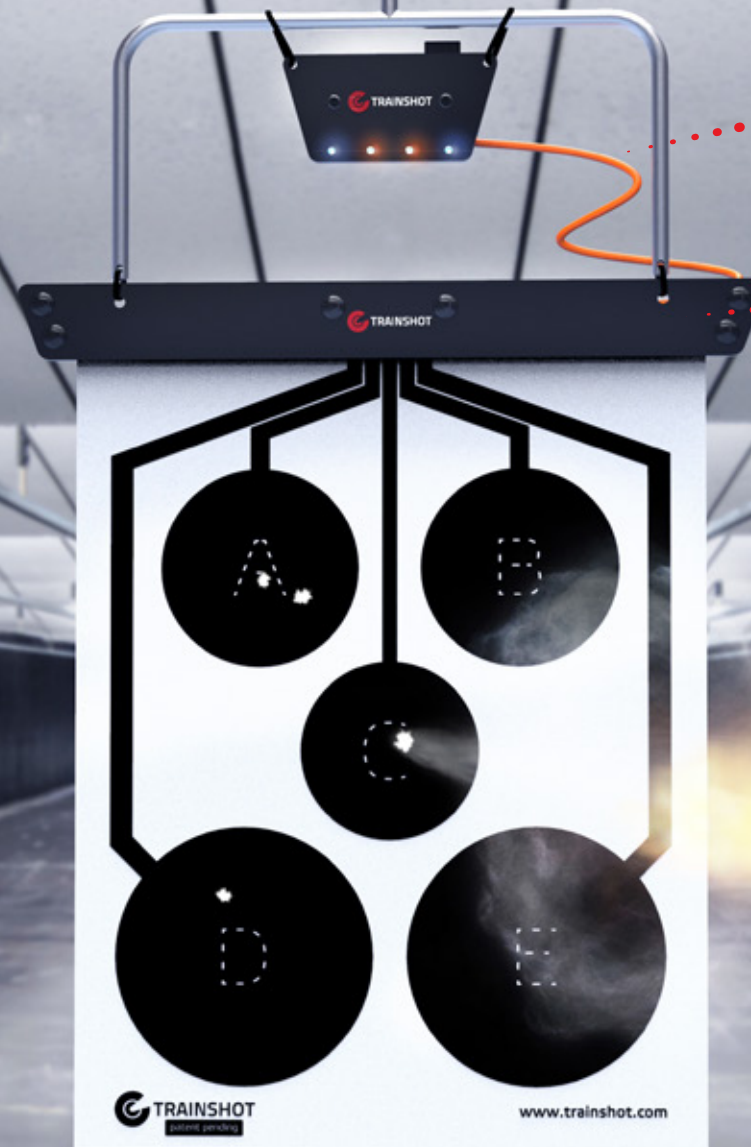

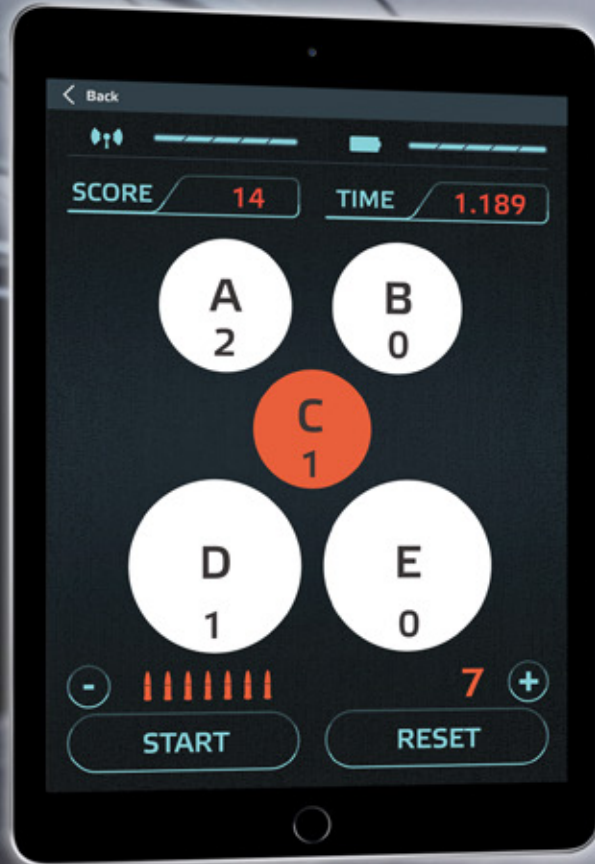

Sends data to your smart device

1. TRAINSHOT TARGET

Detects the hit zone

SHOOTING RANGE KIT

DATA CABLE

Simple and replaceable

EXTENDER

As a convenient option for shooting ranges, we offer a metal extender that can be easily mounted on any construction. Its primary function is to protect the unit from getting damaged by holding the target board further from the device. Extender makes target changing process much faster thanks to slide in system.

BETTER PROTECTION

Step up your technological solutions and go for our kit to give an upgrade to your shooting range facility!

KIT INCLUDES

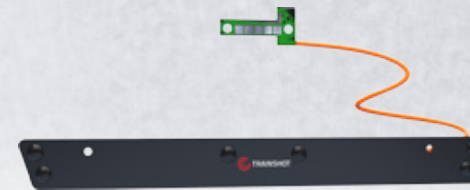

BLUETOOTH
1x ELECTRONIC UNIT

10x TARGET

1x FREE APP

1x EXTENDER

BRIDGE UNIT

EXTENDER

The shooting range kit is a convenient solution for shooting ranges and regular shooters who want to avoid the time-consuming manual work around their beloved activity.

The electronic unit is placed above the extender, a bit further from the target, to avoid damages by being out of the hit zone.

4. SMART DEVICE

- Hit zone
- Score
- Reaction time
- Statistics

3. ELECTRONIC UNIT

Sends data to your smart device

2. HARDOX EXTENDER

Set up the electronic unit on a visible but safe place using an extender and a data cable.

WEAPON

With metal ammunition

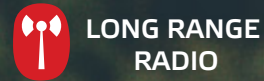

1. TRAINSHOT TARGET

Detects the hit zone

LONG RANGE KIT

Are you into long range shooting? Ditch the basic Bluetooth and go for our special module for longer distances.

LONG RANGE RADIO

BLUETOOTH

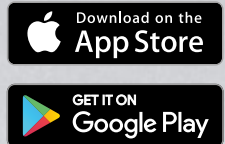

PERSISTENCY

The long-range kit eliminates distances and makes shooting with rifles more convenient. This set-up includes a long-range radio communication module mounted on the unit, a radio bridge connected to your smart device and a protective extender, making it suitable for sniper trainings or hunting challenges.

KIT INCLUDES

 <p>BRIDGE 1x ELECTRONIC UNIT</p>	 <p>10x TARGET</p>	 <p>1x FREE APP</p>
 <p>1x EXTENDER</p>		 <p>1x BRIDGE UNIT</p>

4. BRIDGE UNIT

Receives data from electronic unit and sends them to your smart device despite the long distance

3. ELECTRONIC UNIT

Sends data to the Trainshot bridge unit on a long distance

2. HARDOX EXTENDER

Mount electronic unit on a visible save place using extender and data cable

5. SMART DEVICE

- Hit zone
- Score
- Reaction time
- Statistics

WEAPON

With metal ammunition

1. TRAINSHOT TARGET

Detects the hit zone

SPARE PARTS

BLUETOOTH ANTENNA

Module includes Bluetooth chip, plastic cap and two screws

HARDOX 500 SHIELD

6 mm hardox plating protects inner electronics

LED STRIP

Electronic unit communicates with shooter via light signals

EASY TO FIX

Where weapons are involved, destruction is sometimes inevitable. While the unit is placed in a bulletproof case, we all know accidents do happen. In case your electronic unit gets damaged, you can simply purchase the spare parts and replace them in less than a minute.

ACCESORIES

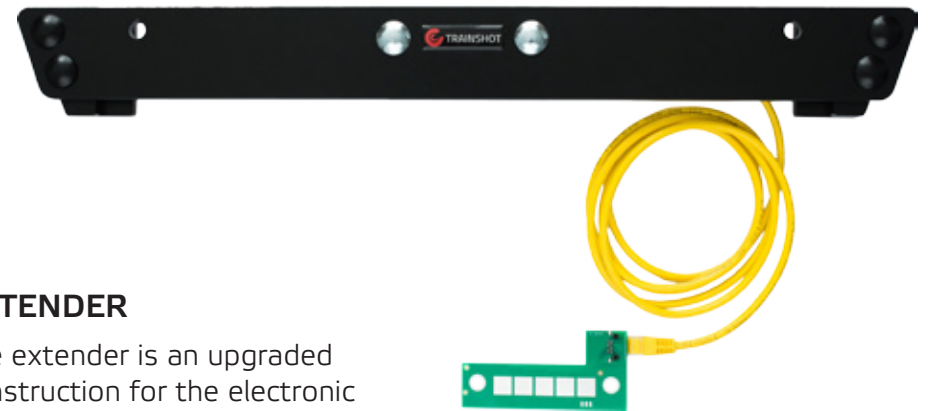

ADAPTER

The adapter charges the electronic unit which makes the system easily portable without the need for additional electric sources. Use only with rechargeable batteries

UPGRADE YOUR SYSTEM

You can extend your kit with separate parts available for purchase.

EXTENDER

The extender is an upgraded construction for the electronic unit that protects the device by distancing it from the hit zone. This extension is highly recommended for shooting ranges.

LONG RANGE RADIO MODULE

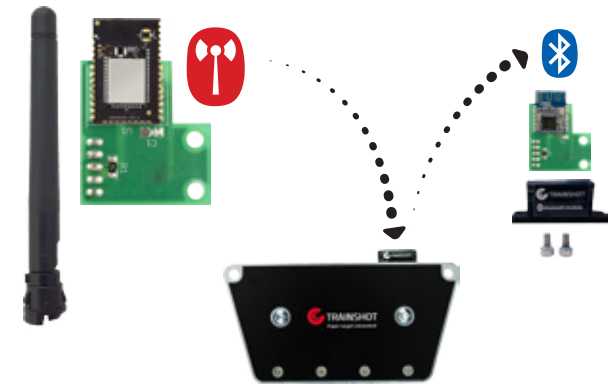

The Long Range Radio Module connects your smart device with the electronic unit when shooting on long distance through radio communication. This extension is recommended for hunting or sniper trainings.

LONG RANGE ANTENNA

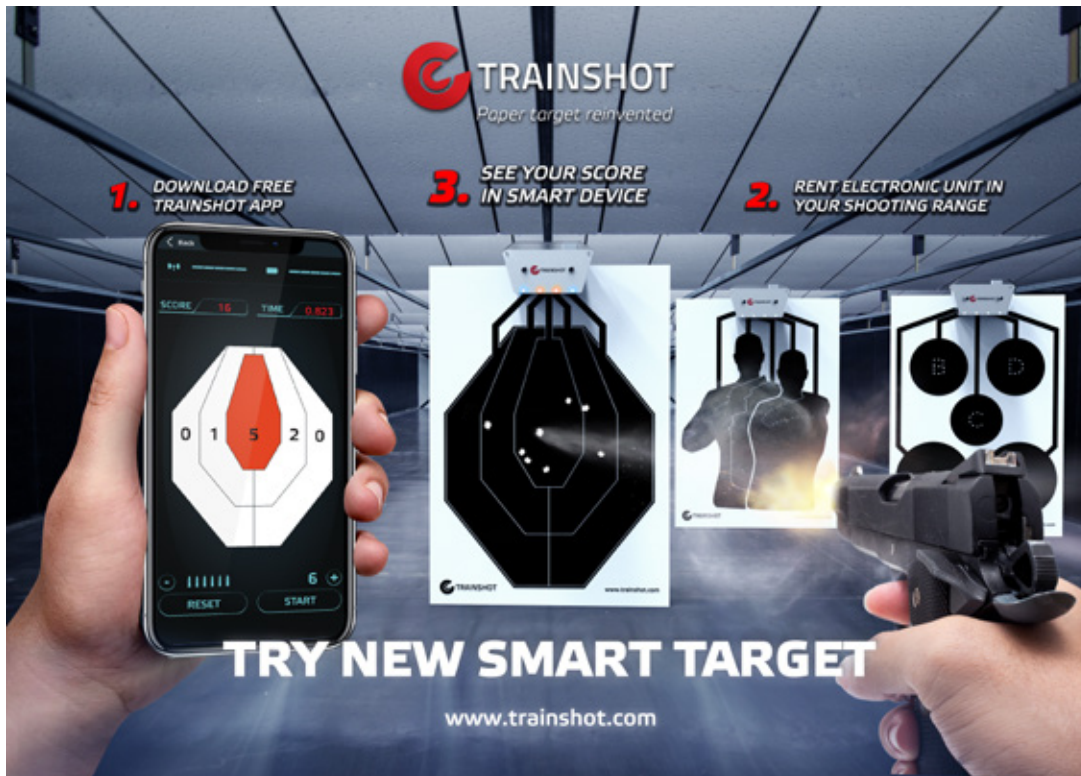

The Long Range Antenna serves as an upgrade for the electronic unit, designed specifically for long-distance shooting.

Replace Bluetooth antenna with Long Range Radio Antenna.

Only the combination of the Long Range Radio Module and Long Range Antenna makes long range shooting possible, due to their unique technology.

MERCHANDISE

TRAINSHOT POSTER A2

Let Trainshot be the pulling force of your business!
Promote your innovative approach and our convenient solution
with our banner in the premises of your shooting range.

TRAINSHOT DOOR STICKER ∅12cm

Mark your business with our Trainshot stickers
and tell the world about your upgrade.
